

## Mr. Alunni

**NATIONALITY:** Italian

### SUMMARY

I am a Professional Civil Technician. I have lengthy experience in the design, detailing and supervision to construction of residential buildings, roads, sewerage, stormwater, water reticulations and irrigation systems acquired in Italy, South Africa and other African Countries. I have been involved in a large number of assignments which have been successfully completed to date, ranging from major fast track commercial and industrial projects to infrastructure projects at various levels. I have experience in operating within the tight financial disciplines imposed by ambitious budgets which I have helped to plan as well as methodical administration to deadlines. My own cosmopolitan background and analytical interests in other cultures, together with a command of several European languages, have also left me confident in handling negotiations that require the reconciliation of different national approaches to otherwise common problems.

### EDUCATION

Diploma di Geometra – Istituto Technico Per Geometri Perugia (Italy), 1964

Above Diploma obtained after passing a State Examination on the following subjects:  
Architectural and Structural Design of Building, Roads and Hydraulic Constructions – Land Survey – Economics and Property evaluation – Civil Law
